

NEXT GENERATION 3000 AND 5000 SERIES WIRELESS SYSTEMS

The new fourth-generation [3000 Series Wireless Systems](#) offer easy setup, versatile operation, and richly detailed high-fidelity sound. Complete with a 60 MHz tuning bandwidth, the new generation 3000 Series Wireless offers twice the MHz tuning range as the previous versions, giving users the power and flexibility to operate within the congested UHF spectrum.

The third-generation [5000 Series Wireless Systems](#) have been designed for use on professional tours, in stadiums, concert halls, festivals, houses of worship and more. Complete with a dual receiver that processes high and low frequencies separately, the new 5000 Series Wireless provides the highest-quality live sound for artists, broadcasters, and presenters worldwide. The receiver has also been updated with a tuning bandwidth of 148 MHz, and users now have the option to select a standard receiver with two XLR outputs or a receiver that also includes a Dante output.

NEW DJ AUDIO EQUIPMENT

The [ATH-PRO5X](#) and [ATH-PRO7X](#) headphones have been specifically designed for use by professional DJs. Both headphone models offer maximum comfort for long sessions, excellent sound isolation, and detachable locking cables. The ATH-PRO5X headphones are equipped with 40 mm drivers, while the ATH-PRO7X headphones include 45 mm drivers, both of which offer extremely accurate sound reproduction even at high volumes.

The new AT turntable is ideal for pro, mobile, and club DJ use, as it has been built to deliver exceptional music reproduction even under the most demanding conditions. The [AT-LP1240-USB XP turntable](#) uses a powerful direct-drive motor for unwavering speed stability, and features a variety of additional DJ-friendly features, such as forward and reverse play and back-cueing.
