

### RETRO ACTIVE PICKUPS

### FAT 55 SET

The EMG Retro Active Fat 55 humbucker set was inspired by the ingenuity, tone, and feel of the original PAF, evoking the best tones of the 50's and 60's. No longer limited by the technology of that era, this classic looking humbucker set adds a newly designed external preamp that provides the benefit of a low-impedance output; virtually no hum or added noise.

### SUPER 77 SET

Inspired by the varied guitar tones created in the 70's, the EMG Super 77 humbucker set brings grit and edge that responds to your playing like nothing you've heard before. With a newly designed plug-on preamp and classic open coil look, you'll get the response of a traditional humbucker with the benefit of a clean, noise free, low impedance output.

### MF SET

Guitar virtuoso [Marty Friedman](#) relies on only the best of everything to deliver his unique one-of-a-kind guitar mastery. EMG had been part of this equation for the former Megadeth guitarist for years. EMG president and founder Rob Turner set out to develop a brand new passive signature set for Marty that delivered all of the dynamic response, power, punch and clarity that only EMG can.
