

## UV Technology Expands to Bass Heads

The UV1 series is the number one solution for drummers who are tired of flaked, chipped, and worn out coatings. The patented UV-cured coating provides unmatched durability and consistency of texture while the unique 10mil film delivers exceptional strength and versatility for a full range of musical applications. Combined with Level 360 Technology™, the UV1 is the most versatile and durable 10mil drumhead that drummers have ever laid their hands on.

Now expanding into bass heads, the series is launching in three different versions. Standard UV1s feature the same durable 10mil, single-ply film featured on the tom heads. The UV EQ4 has a fixed internal overtone control ring that reduces sustain and focuses the tonal response of the drum while the EMAD version has the benefit of adjustable damping for added attack and focus. These drumheads will be available in sizes ranging from 16" to 26" in tom and bass hoop variants.

### UV1 Bass Heads

Item #	Description		UPC
B16UV1	16" UV1 Coated – tom hoop		019954209537
